

# TUFTEX® DeckDrain™

Affordable Deck Ceiling and Drainage System

*Before Installing TUFTEX DeckDrain*

*After Installing TUFTEX DeckDrain*

The TUFTEX DeckDrain system will keep the area under your deck dry and looking great. This deck drainage system is easy to attach below an existing deck and forms a ceiling over the space below the deck. The TUFTEX DeckDrain panels catch and divert water away from the area under the deck. Please read our installation instructions for more details.

TUFTEX DeckDrain panels are designed with a corrugated octagonal-wave profile to provide channels for the water to drain. The panels are opaque and available in tan or white color. The panels can be purchased in 8-, 10-, or 12-foot lengths, and are made from our most weather-resistant vinyl material.

## Benefits of Installing TUFTEX DeckDrain

TUFTEX DeckDrain creates a bright, cool and dry space under an elevated deck for

- A covered outdoor retreat protected from sun and rain
- An entertainment area year round
- A play area for children or pets
- Additional protected storage for lawn and garden tools, lawn furniture, and firewood

TUFTEX DeckDrain will add value to your home by creating more usable space and preventing damage associated with water and moisture under the deck.
